**“Metal knitted anti-slashing suit for law enforcement officers” (L.H. Vyshnevskyi, L.R. Vyshnyakov, N.M. Khokhlova, V.L. Lemeshko).** The scientists developed for law enforcement officers an anti-slashing knitted material that is made of high strength threads and hardened over them with metal wires integrated into a complex jute of knit interviewing. The metal wires are loosely winded over the threads thus providing an additional relief protection composed from protruding spiral metal loop on the working surface. A high strength steel is used as metal wires. The developed material has high strength, it is flexible and water absorbing. It is used for making items of personal protection against slashing effect of cold weapon.

**Ceramics-polymer composite materials including armor elements with enhanced protection and weight effectiveness (L.R. Vyshnyakov, O.V. Neshpor, O.V. Mazna).**

The IPMS of National Academy of Sciences (NAS) of Ukraine has developed a structure of combined ceramics-polymer material with high ballistic resistance (5-6 level of protection) and with an advantage of specific weight of 2.15-2.8 times lower in comparison to similar steel armor ones. The use of reaction sintered silicon carbide and home available raw materials reduce the cost of the protection articles by 2-3 times relative to other ceramics. A production shop to make products of armor protection applications is organized at the IPMS of NAS of Ukraine.

**DATAGROUP PJSC****31-33 Smolenska St., UA-03005 Kyiv, Ukraine****tel.: +38 044 538 00 37****fax: +38 044 538 00 36****e-mail: info@datagroup.ua****www.datagroup.ua**

Datagroup is the national leading telecommunications operator on the telecommunications market.

Since the founding of PJSC Datagroup in 2000, the company has become the serious player on the market of telecommunication technologies. Today, the operator keeps the leading positions on the main segments: wideband Internet access, data transmission, international transit of traffic, satellite communication. The company is the most stable, reliable and progressive fixed-line telecommunications provider.

Datagroup offers to its customers all kinds of professional telecommunication services. The main direction of activity is the organization of channels for data transmission and the connection to the Internet, services of fixed-line and digital telephony, equipment installation, radio and satellite communications, video conferencing and video surveillance. The company has created a national network throughout Ukraine with a special attention for the regions and has become one of the leaders according to the geography of provided communication services.

Currently Datagroup has its own fiber optic network in all regions of Ukraine with the total length of more than 21 000 km, the newest satellite communication network on the basis of KA-SAT satellite, covering 85% of the domestic market. Datagroup is the leader in VSAT satellite communication segment in Ukraine and Commonwealth of Independent States. The customers of the company receive high quality communication at uniform rates regardless of the connection method and geographic location.

The satellite communication systems allow obtaining the following advantages:

- permanent accessibility of communication for all spots in the area of satellite servicing;
- quick putting into operation of all terminals absolutely, notwithstanding their location;
- broadband communication services;
- round-the-clock non-stop servicing;
- effective transmission of multi-addressing and broadcasting messages.

On the basis of DirecWay HUB, all types of transmissible information operate reliably and stable – data, video, voice.

On the basis of TooWay, the high speed of connection can be provided, satisfying the modern requirements.

Modern telecommunication infrastructure and constant innovation are the main advantages of Datagroup and allow to work not only in the corporate segment, but also to participate in the development and implementation of major public projects.

**GUNMAGAZINE.COM.UA**

[www.gunmagazine.com.ua](http://www.gunmagazine.com.ua)

Originated in web in 2000 Internetportal gunmagazine was developed by a group of enthusiastic former national sports riflemen, who defended the honour of Ukrainian shooting sport within different national teams of the USSR since 60s of the XX century and whose sports career had finished with the disintegration of once "the great and mighty" sport as a whole, and the domestic national shooting sport for the mass, in particular.

It is the first weapons Internetportal that has presented Ukraine in the www. Registered later on as The First Ukrainian Weapons Internetmagazine, this resource was made with an eye to: elucidatory and enlightenment activity; popularization of the shooting sport as one of a few Olympic kinds of sports cultivated in Ukraine; improvement of the weapons handling standards among the regular people.

The Russianlanguage resource is focused on a wide Russianspeaking audience of arms lovers worldwide. In future, we plan to broaden the language range, first of all, to Ukrainian version.

In our Internetmagazine, any weapons amateur will find for himself an interesting information and have a discussion with likeminded persons and write an article having set forth his vision of one problem or another associated with shooting sport and weapons, in particular.

**GUNMAN.RU,  
INFORMATIONAL PORTAL**

“GUNS” WEB SITE.

Ukrainian Arms Market under the same roof!

We provide a convenient search mechanism for weapons, supplies and accessories of all types which are sold in the territory of Ukraine.

The system allows to compare prices in any region of Ukraine, helping to choose the most advantageous position regarding pricelocation correlations.

We are dedicated to organize a meeting place for Buyer and Seller at a neutral territory, making an easy sale for the Seller and convenient for the Buyer.

The advantage of cooperation:

- Now Your store works 24 hours a day, without breaks and daysoff.
- We will be the first to promote updates of your shop.
- We can advertise your anticipated arrival of goods.
- Actual prices in the Internet network.
- Participation in the largest Ukrainian Internet weapon base.

Our goal is not just to win Your trust, but to get a true Partner!

## MILITARY INSTITUTE OF ARMAMENT TECHNOLOGY

**7 Prymasa Stefana Wyszyńskiego St.,  
05-220 Zielonka, Poland  
tel.: +48 22 761 44 25  
fax: +48 22 761 44 45  
e-mail: witu@witu.mil.pl  
www.witu.mil.pl**

Military Institute of Armament Technology (MIAT) in Zielonka is one of the key scientific and research-development institutions in the armament field in Poland. MIAT supports the modernization process of Polish Armed Forces by providing innovative and complex solutions in the area of weapons and military equipment.

MIAT's range of activities includes tests, analyses, standardisation, design and expertises in the areas of artillery, small arms and aviation armament, radar and missile systems and ammunition research and testing.

The Institute's main objective is to maintain the highest level of specialisation in the domain of its' activity and to adapt even better to the increasingly competitive market. The quality and innovativeness of MIAT's products have been confirmed by certificates and awards, corroborating its' leading position among other military and civilian institutions dealing with development and upgrading of weapon systems.

One of the most important areas of Institute's activity focuses on weapon safety issues. MIAT constantly upgrades its' wide range of weapon life-extension programmes, which prolong the service life of aged armament and enhance

its safe use in the future. Presently the Institute performs test and expertises concerning i. a. anti-aircraft missiles, anti-tank missiles, base ammunition and explosives. Laboratory tests conducted by experienced researchers enable the simulation of extreme conditions that can occur on the ranges or on the battlefield.

MIAT has been acting to promote science by sharing its innovative solutions and results of research and development works. Annual International Scientific-Technologic Conference ARMAMENT, brings together a diverse range

of researchers and experts and gives an opportunity to exchange opinions and present the latest R&D achievements of the military technology sector.

MIAT also conducts extensive cooperation with foreign partners. Participation

in projects of the European Defence Agency (EDA) and NATO Headquarters' plays a significant role on the map of MIAT's international activity.

MIAT took part in the first phase of EDA's project Active Protection System (Active Protection Systems Study – APSS), which goal was to find the best solutions for the European system of active protection of light armored combat vehicles.

The representatives of Germany, the Netherlands and Finland also took part in above mentioned project. MIAT will continue its' works during two further phases: Specification of an APS and Demonstration of an APS.

## MOLNIYA PJSC

Loksak is US manufacturer of hermetic storage bags. Bags aLoksak keep content safe from water, dust and sand. Products used by the US military, the FBI for valuables, documents, electronics and transportation biohazard products.

**Technical features:**

- waterproof up to 60 meters/200 feet;
- electronic devices stay fully functional and operable;
- protects against microscopic particles like dust, sand, salt;
- the sizes: 12 x 12 cm to 30 x 123 cm;
- suitable for foodstuff and biologically dangerous products;
- operating temperatures: -40°C to + 60°C;
- made in USA.

**Areas of use:**

- storage and usage of electronics in wet or muddy conditions;
- protection of weapons of moisture;
- storage and transportation of biologically hazardous materials;
- medical kits protection from moisture and water;
- protection of documents.

SHIELDSAK is a lightweight fabric bag that blocks RF signals safely. Used for the safe use of devices with embedded chips to protect against hacking, tapping and determine your location. Contactless readable documents, credit cards and devices are protected against unauthorized reading. No chance for hackers, scanner or tracker! RFID chips (radio-frequency identification) allow the automatic identification and localization of objects and living beings, and thus greatly facilitate the collection of data (colloquially also called radio frequency identification).

**NOVA ROBOTA, MAGAZINE  
YUNIST, COMPANY LTD**

7b Lesya Kurbasa Ave.  
UA-03194 Kyiv, Ukraine  
tel./fax: +38 044 596 45 10  
e-mail: pilipenko@novarobota.ua  
www.novarobota.ua

“Yunist” Ltd started its activity in 1991. It works in the field of employment and education and it publishes the “Nova Robota” newspaper, the “Kudy Pity Navchatys” journal and makes websites www.novarobota.ua, www.gotostudy.com.ua.

The “Nova Robota” is a newspaper of hot vacancies. It is distributed in Kyiv, Kyiv Region and partially in the regions of Ukraine. It is issued twice a week: on Mondays and Thursdays.

By ordering the publication of announcements about the recruitment in the “Nova Robota” magazine, you will promptly fill the vacancies with the specialists worthy to work in your company.

Its regular heads are:

- vacancies in the enterprises of Kyiv and Kyiv Region;
- work abroad;
- vacancies of recruitment agencies;
- advice and consultations as for employment, legal advice etc.

Its subscription index is 35335.

The “Kudy Pity Navchatys” is the first All-Ukrainian specialized journal in the field of education. It contains detailed information about the education in Ukraine and abroad. It is distributed throughout Ukraine:

- through retail trade network;
- in public schools, with the help of the Chief Directorate of National Education;
- at specialized educational exhibitions;
- with the help of the heads of the parent-teachers’ associations.

It is issued 6 times per year.

We invite you for cooperation. We will do our best to attract the readers’ attention to the high quality of education and other benefits of your educational institution.

Its subscription index is 21927.

**NOVATOR SE**

17 Ternopilska St., UA-29016 Khmelnytskyi, Ukraine  
tel.: +38 03822 2 10 74  
fax: +38 03822 78 80 13  
e-mail: office@novator-tm.com  
www.novator-tm.com

Novator Enterprise is the original manufacturer of the N019 airborne fire-control radar complex (FCRC) of the MiG-29 airplane and the N001 of the Su-27, Su-30MK airplanes.

Novator Enterprise manufactures:

- aircraft transponders for all airplanes (SO-69, SO-72M, A-511, SO-70) and carries out their upgrade;
- VEYER-M short-range navigation and landing system.

As to the N019, N001 radars, the enterprise carries out an upgrade of the N019-09 units by installing low-noise amplifiers in the M55104 modules instead of the parametric amplifiers with the purpose to increase the radar reliability. This upgrade increases the N019-09 unit reliability ten times.

The technology of repair of the M45210 (M45212), M45211-1 (M45213-1), M55112 (M55104-1), U52157 (U52151-1), U52172 (U52155) microwave modules, LNA (low-noise amplifier) has been developed. The cost of the overhaul of units, modules and assemblies does not exceed 20 % of their price.

Novator Enterprise accomplishes:

- delivery and repair of the N019, N001 radars, separate units, assemblies, modules;
- delivery of equipment to furnish the repair base: PS7-061, PS7-055 devices, ERP7-036 tester (repair of the N001-22 unit), ERP7-036AR/ERP7-036AT testers (repair of the N019-02 unit), ERP7-037 tester (repair of the N019-09 unit);
- delivery of the M45210, M45211 transmitting modules, U52155 frequency synthesizers, M55104MI microwave receiving modules;
- delivery of the Buran-A weather radars and BR457 multifunctional indicators (MFI);
- delivery of the SPS-2000 (TCAS II) collision avoidance systems together with the BR210 S mode remote transponder;
- “Harant” product – control radio link suppression system;
- multi-channel radio stations UKH.

ISEE SSU is a state specialized expert research establishment, which performs scientific, technical and scientific, organizational and scientific, forensic and expert activities, acts as an expert service of the Security Service of Ukraine. ISEE SSU produces and implements special technical devices and special-purpose equipment.

Main fields of ISEE SSU activity:

- technical regulation in the area of special technical devices in terms of providing licensing of an economic activity on development and manufacturing of special technical devices;
- development of special technical devices for the SSU departments and other operational investigation entities;
- performing forensic investigations and forensic studies for the SSU departments, other law enforcement agencies and court;
- preliminary identification of state export control goods.

The Centre of forensic and specialized investigations (CFSI) executes 15 types of forensic investigations in 36 specialities: graphology, document forensics, ballistics, trasology, fingerprint identification, explosive forensics, video and audio forensics, computer and telecom forensics, narcotics, psychotropic and biological substances forensics, economic forensics etc.

ISEE Testing Center (TC ISEE) performs testing (compliance assessment) of technical devices to the compliance with requirements of regulatory documents in the area of telecommunications and instrumentation of the resistance to the higher and low temperature, higher humidity, the firmness of products during transportation and its safety usage.

TC ISEE is accredited by NAAU to the compliance with requirements of DSTU ISO/IEC 17025:2006 (accreditation certificate № 2H1104, 15th of April, 2013).

The national public organization “Ukrainian Gun Owners Association”. The one and only high profile association in Ukraine that defends the gun owners interests. The mission of the organization is to unite gun owners in support of our common interests so that we may work together as a team, allowing our members a common voice and an effective defense. We further support and work toward the liberalization of guns laws in Ukraine. The Association actively backs the adoption of the gun laws in Ukraine that would allow Ukrainian citizens to purchase and carry concealed handguns for purposes of self-defense.
